DETAILED ACTION

Claims 1-20 are currently pending in the instant application.

I. *Priority*

The instant application is a 371 of PCT/CH04/00688, filed on November 15, 2004 and claims benefit of Foreign Application SWITZERLAND 2038/03, filed on November 28, 2003.

II. *Information Disclosure Statement*

The information disclosure statement (IDS) submitted on May 25, 2006 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

III. *Restriction/Election*

A. Election: Applicant's Response

Applicants' election with traverse of Group I in the reply filed on September 24, 2008 is acknowledged. The traversal is on the ground(s) that: (1) that there is no difference between Group IV and Group VI or Group V and Group VII.

All of the Applicants' arguments have been considered but have not been found persuasive. It is pointed out that the restriction requirement is made under 35 U.S.C. 121. 35 U.S.C. 121 gives the Commissioner (Director) the authority to restrict applications to several claimed inventions when those inventions are found to be independent and distinct. The Examiner has indicated that more than one independent and distinct invention is claimed in this application and has restricted the claimed

Art Unit: 1626

subject matter accordingly.

The Examiner wants to point out that the reason claims 16-17 have been grouped separate from claim 19 is because Applicants are claiming a different method for preparing the crystalline form A and the same goes for claims 18 and 20. Different methods for preparing a compound are considered different inventions.

Subject matter not encompassed by elected Group I are withdrawn from further consideration pursuant to 37 CFR 1.142 (b), as being drawn to nonelected inventions.

IV. Rejections

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13 and 16-18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 13 and 16-18 recites the limitation “the product obtained by crystallization” which is dependent on claim 1 but crystallization is not mentioned in claim 1. There is insufficient antecedent basis for this limitation in the claim.

Claims 16-18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, claims 16-18 mention Form A or Form

Art Unit: 1626

B but do not disclose any physical characterization data. Simply referring to a crystalline form as "Form A or Form B" does not clearly define which crystalline form is being claimed. Applicants need to include physical characterization data such as X-ray diffraction data in the claims to overcome the rejection.

Regarding claim 4, the phrase "for example" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

V. Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shawquia Young whose telephone number is 571-272-9043. The examiner can normally be reached on 7:00 AM-3:30PM.
